

Spanish

At Trenance, we believe that learning languages should be engaging and fun while challenging pupils to be language detectives. Lessons are taught through a series of activities such as songs, games and listening to simple stories.

Spanish is a phonetic language, so the learning of it will help cement the phonics knowledge in English.

During lessons, pupils will have lots of opportunities to practise their Spanish speaking with other pupils and their teacher.

Pupils will also learn interesting facts about Spanish speaking countries, which will give them a knowledge of other countries and cultures. We believe that our broad and balanced curriculum will instil a love of languages in our children that will make them curious about other countries and cultures around the world.

Foundation

- Recognise and say basic introductions (hello, goodbye, thank you, please)
- Begin to recognise and say some colours
- Sing songs in Spanish

Year 1

- Recognise and say numbers 1-10
